LUXOR®

60 YEARS OF ITALIAN TRADITION

Luxor is an important industrial reality, world wide and European market leader in the production of flexible hoses and components for hydro and thermo-sanitary installations. Luxor has been the expression of the most prestigious made in Italy and the great Italian high technology mechanical workings tradition for fifty years; a quality certified and recognized by the most prestigious International Certification Institutes all over the world.

Our mission is the complete customer satisfaction through a process of continuous technological research in order to make high quality, reliable products, anticipating the market evolutions by innovative partnership with both customers and

suppliers. Luxor mission takes place in its own Research and Development Centre in which new and advanced technologies are constantly analyzed and researched with continuous investments to offer the most innovative and reliable solutions for the international markets at competitive costs, ensuring strict quality controls on each single piece.

Luxor entirely plans and realizes each product, thanks to its decennial know how. The great production strength, a "slender" innovative and advanced industrial organization together with a modern logistic conception, make Luxor able to satisfy every kind of request, even customized, with fast deliveries all over the world.

50TH SERIES

Designed on the occasion of the fiftieth anniversary of Luxor's foundation, the 50th Series represents the highest expression of the union of design and functionality. The whole range, characterised by a minimal and elegant design, is finished with chrome plating, which guarantees a thicker coverage and, as a consequence, a better resistance to ageing and corrosion, not to mention a superior aesthetic appearance.

The valve bodies are made using CW617N low lead brass, the screw is made of CW614N brass, all the gaskets are made of peroxide EPDM and the handle, made of ABS with a chrome finish, has high mechanical properties which allow it to withstand the traction, torsion and impact stresses to which it may be subjected during its normal use.

The range of angle valves, traps and flexible hoses of the 50th Series complete the Luxor furnishing series; these products are chromed using galvanic processes that comply with the strictest international health and environmental safety regulations, which guarantee hygienically safe and reliable products.

HOW TO SELECT THE CORRECT COAXIAL VALVES

COAXIAL RIGHT THERMOSTATIC KIT

COAXIAL LEFT THERMOSTATIC KIT

The characteristics of the fluid in the system must be compliant with the UNI 8065: 2019 directive.

50th SERIES THERMOSTATISABLE VALVES WITH PRE-REGULATION

CONNECTION FOR COPPER AND PLASTIC PIPE G3/4 EUROKONUS

The screw of 50th Series valves allows to preset the flow thanks to a shaped acetal ring. The thermostatic screw enables to replace one of the o-rings on the control stem without draining the system.

RS 2059/A

50th SERIES MANUAL VALVES AND LOCKSHIELDS

CONNECTION FOR COPPER AND PLASTIC PIPE G3/4 EUROKONUS

The 50th Series manual valve features a fixed stem, whose tightness is ensured by two o-rings. When in closed position, the tightness is granted by a flat gasket. The tightness of 50th Series lockshields is ensured by an o-ring on the obturator and, if necessary, by a further o-ring between the body and the plug. All lockshields allow for flow adjustment by limiting the lift of the obturator.

50th SERIES THERMOSTATIC KIT

CONNECTION FOR COPPER AND PLASTIC PIPE G3/4 EUROKONUS

Ease of installation, maximum importance to safety and attention to aesthetics: the thermostatic kits are the result of choices aimed at product improvement and energy optimisation.

Inside the valves there is a shaped acetal ring to determine the maximum flow of the valve. The thermostatic headwork, designed for long life, allows the replacement of one of the o-rings on the control rod without emptying the system.

50th SERIES MANUAL KIT

CONNECTION FOR COPPER AND PLASTIC PIPE G3/4 EUROKONUS

The tightness and efficient performance of the components are guaranteed by the chromed brass. Attention to detail means that the product also becomes a design object, not only taken care of from an aesthetic point of view, but also from a purely functional one. Sealing when closed with the shutter is ensured by a flat gasket.

50th SERIES ANGLE VALVES

UNDERSINK KIT

The entire 50th Series range of angle valves is produced with chrome drag finishing which ensures maximum durability of the products. The bodies of the angle valves are made using CW617N brass with a low lead content. The screw is made of CW614N brass and all seals are made of peroxide EPDM. 50th Series angle valves undergo a double polishing process to achieve an excellent finish.

50th SERIES TAPS

FURNISHING TRAPS IN CHROMED BRASS

The furnishing 50th Series are hand polished and produced with frame chrome plating finish, which guarantees a next to a top level aesthetic finish. The peculiar and exclusive feature of the furnishing trap is the double o-ring tightness and the slip-off sleeve, system that allows to cut in a second step the drain sleeve without spoiling the whole trap due to a wrong cut on the drain pipe.

FURNISHING TRAP

Furnishing brass trap without drain, chrome or black finish, with sleeves, inspection cap, wall cover and collar in chromed brass.

50th SERIES SHOWER FLEX FLEXIBLE HOSES

FLEXIBLE SHOWER FLEX

The chrome plated brass hoses are low lead in compliance with the latest regulations. The chrome finish is made using galvanic processes that comply with the strictest national regulations and international standards in the field of health and environmental safety: preserving the quality of the water while protecting the health of consumers has always been a cornerstone of Luxor's mission. The pvc hoses are reinforced with a specific fabric for greater resistance to pressure. The fittings are made of CW614N brass and one of the fittings is rotatable for ease of use.
